To whom this may concern,

I am writing to recommend the services of the Axtell's Inc. The Gary/Chicago International Airport utilized Axtell's Inc. for runway and taxiway pavement markings as per Federal Aviation Administration guidelines during our runway expansion and markings project of 2015. We were extremely satisfied with the services provided.

They do an excellent job, are always punctual, and offered the most competitive rates during our bid process.

The employees were exceptional and very knowledgeable of their jobs. They were extremely polite and accommodating by working during off hours and even providing tips to the Airport's Maintenance Technicians on best practices in maintaining the painted surfaces.

I'm happy to recommend the services of Axtell's Inc. If you have any questions, feel free to contact me.
