Axtell's, Inc.
Mr. Robert Butts
1586 Heart Lake Road
Jermyn, PA 18433

Dear Bob,

I would like to thank you and your entire company for conducting such an excellent job on the pavement maintenance and complete airfield remarking project that was conducted last summer/fall (2015). I am extremely grateful for the way that the project turned out and also for the opportunity to work with you and your entire team to achieve such a fantastic result.

I am happy to tell you that we completed our FAA annual inspection in December and that the inspector was very pleased with our pavement condition and with all of our airport markings. At one point, the inspector commented that "this was the best that this airport has looked in a long time". This project required significant planning, efficient execution, and a contractor that keenly understood the very delicate balance between marking eradication and pavement preservation, all of which your company did extremely well. I am confident that Hancock County received the highest level of workmanship and finished product quality on this project.

Above all, I was most impressed by the character of the people at your company. All of your team carried themselves in an ethical, consciences, and professional manner that undoubtedly contributed to the project's success. I hope that we get the opportunity to work with your firm again in the future, and would gladly recommend your firm to anyone who asked.

Sincerely,

Brad Madeira
Airport Manager
