Attn: Peter C. Mills Jr.
Re: 8800 16 Airfield Pavement Rehabilitation
Subject: Letter of Recommendation

Mr. Mills,

Please allow this correspondence to serve as a thank you for a job well done for us at Tampa International Airport with the shotblasting / emulsified asphalt sealcoat installation.

Your team was on time, pleasant to engage with and completed your scope of work within our budgeted cost. You helped us to adapt to the airport's ever changing needs as we reacted to the various stakeholders who occupy the space of the FBO apron – resulting in several on-the-fly phasing changes to minimize our impacts to the airport tenants. You exercised great care in completing the operation near high-end private airplanes without incident.

Additionally, your rapid response to airport questions upon the completion of your work regarding the sealcoat performance is greatly appreciated.

We would not hesitate to work with Axtell's Inc. again in the future and look forward to our next endeavor together.

Sincerely,
DAVID NELSON CONSTRUCTION CO.
