

Rhode Island Airport Corporation

August 17, 2021

To whom it may concern,

On behalf of the Rhode Island Airport Corporation (RIAC) it is my pleasure to recommend Axtell's Inc. for construction services with future prospective clients.

In April 2021, Axtell's Inc. was contracted by RIAC to perform the work necessary and required for a runway threshold displacement and pavement marking modifications at the Newport State Airport in Middletown, Rhode Island.

Axtell's Inc. was expected to fully complete the work within six (6) calendar days. Axtell's crew was able to successfully fulfill their obligations in two (2) calendar days. The crew was also accommodating when dealing with unforeseen conditions and demonstrated attention to detail, quality, and safety.

We are pleased with this effort and the quality of the work as the runway shutdown time was minimized and ready for use in such a timely manner.

Sincerely,

Duc Nguyen, PE, PMP, CEFP

Vice President, Chief Infrastructure Officer
